APPOINTMENT AND STRATEGIC REPRESENTATION LETTER

TO: Saadia Lakehal, CEO – Emperia Industries Connect

PASSPORT: HM968576

REF.: Appointment as Strategic Partner for International Business Development – Algeria

Dear Ms. Saadia Lakehal,

By means of this letter, **AG Agropecuária** and **AG Genetics Token**, represented for the purposes of this letter by **Vilton Lima, Director of AG Agropecuária and AG Genetics Token, and by Clesio Landini, Director of AG Genetics Token**, formally appoint you as **Strategic Partner for International Business Development**, with priority and exclusive performance within the territory of **Algeria**, under the term and conditions set forth in this letter.

Your role will focus on the commercial and institutional prospecting of investors, buyers, and partners interested in **premium Brazilian cattle genetics**, including **semen, embryos, and high-value biological assets**, with emphasis on **Wagyu genetics**, globally recognized for their **exceptionally high value and international premium standard**, in addition to other strategic assets such as **Monte Roraima (Brangus breed)** and elite donor females from our stock.

AG Agropecuária is supported by a **productive and technological ecosystem** composed of strategic partners and laboratories of recognized relevance in the Brazilian market, such as **CRIO** and **BIOTEC**, in addition to **Lirance**, the technology arm dedicated to the **digital and economic structuring of real assets**, contributing to the organization, traceability, and value enhancement of operations linked to genetics and biological assets.

The company also maintains a **significant genetic bank**, composed of materials of high genetic, zootechnical, and commercial value, reinforcing its capacity to serve strategic opportunities in both domestic and international markets.

As a competitive differentiator, part of its biological assets may be integrated into a **blockchain-based infrastructure for registration, traceability, and digital economic organization** through **AG Genetics Token**, contributing to greater transparency, documentary integrity, and operational sophistication in international transactions.

This appointment authorizes Ms. **Saadia Lakehal** to act in **commercial and institutional representation**, opportunity prospecting, and the initial intermediation of contacts in the Algerian

market. However, this letter **does not authorize** the execution of contracts, the assumption of obligations, the receipt of funds, the granting of guarantees, or the formalization of commitments on behalf of **AG Agropecuária** or **AG Genetics Token** without prior express written authorization from their representatives.

The conditions of this appointment are subject to the following parameters:

1. Scope of activity

Development of commercial, institutional, and strategic opportunities related to the international expansion of Brazilian cattle genetics, with potential for relevant negotiations in the target market.

2. Indicative investment or transaction range

The opportunities under prospecting may involve transactions estimated between **USD 1,000,000.00 (one million U.S. dollars)** and **USD 3,000,000.00 (three million U.S. dollars)**, depending on the evolution of negotiations, the interest of the parties, and the commercial validation of each operation.

3. Validity period

This appointment shall remain valid for **3 (three) months** from the date of its signature. Any renewal of exclusivity shall depend on concrete progress in negotiations, commercial performance, and formal alignment between the parties.

4. Documentary requirement

Whenever applicable, each opportunity presented shall be accompanied by a formal expression of interest from the prospective investor or buyer, preferably by means of a **Letter of Intent (LOI)** or equivalent document, containing a description of the interest, estimated volumes, and preliminary transaction terms.

5. Nature of the letter

This letter constitutes a **limited commercial and institutional mandate** and shall not be construed as a partnership, joint venture, employment relationship, equity participation, automatic assignment of rights, obligation to conclude a transaction, or definitive commitment between the parties.

We are confident in the potential of this cooperation to expand the international presence of Brazilian cattle genetics in the Algerian market and to strengthen a strategic bridge between Brazil and Algeria, based on productive excellence, technical credibility, and innovation applied to biological assets.

Sincerely,

Vilton Lima

Director – AG Agropecuária / AG Genetics Token

Clesio Landini

Director – AG Genetics Token
